

Averill Park Central School District

Multi-Tiered Systems of Support Plan

2023-2024

MISSION, VISION, & GOALS

AP Mission

To meet the needs of and create opportunities for every student every day.

AP Vision

To create passionate learners who contribute positively to their community and the world.

AP District Goals

Goal # 1: Students will graduate college and career ready.

Goal # 2 Students will productively engage in their school community.

Goal # 3: Students will be digitally fluent, demonstrating the ability to live productively and safely in a technology-influenced society.

INTRODUCTION TO Multi-Tiered Systems of Support (MTSS), Response To Intervention (RtI), & Academic Intervention Services (AIS)

Multi-tiered Systems of Support (MTSS) is a framework used with the intent to clarify, streamline, and incorporate best tools and practices so that each student has the best chance of meeting their full potential. MTSS is a framework used to identify and support struggling learners. MTSS is not a specific curriculum, but a proactive approach establishing targeted supports to address academic, behavioral, or social-emotional needs. The purpose of establishing an MTSS process is to:

- Ensure equitable and immediate access to intervention
- Provide early screening and prompt interventions for all students
- Identify risk factors for early literacy and foundational math skill development
- Employ evidence-based practices for students with academic deficits

Academic Intervention Services (AIS) includes two components: additional instruction and support services. Additional instruction supplements the instruction beyond the general curriculum and assists students who are at risk of not achieving the State learning standards. Support Services address barriers in order to improve academic, social, and emotional performance. Our goal is to provide supplemental instruction and/or student support services intended to assist students in meeting the expectations of the NYS Next Generation Learning Standards. Academic Intervention Services (AIS) may be made available to students with disabilities on the same basis as nondisabled students, if the student is not already receiving special education services in the specific area of concern. AIS is available to English Language Learners (ELL) and must be supplementary (in addition to and not in place of Tier 1). AIS cannot replace the ELL instructional program requirement under CR Part 154 services. AIS will be planned and implemented in coordination with the ELL student's general education program. A school district may provide a Response to Intervention (RtI) program in lieu of providing AIS when an RtI program is made available by grade levels and subject areas (reading/writing/math) for which students are identified as eligible for AIS.

Response to Intervention (RtI) is a school-wide process, guided by assessment data, which organizes instruction and tiered support services to deliver high quality instruction to meet the diverse needs of learners. It is an ongoing process of using student performance and other data to guide instruction and intervention decisions. It is the practice of providing high-quality instruction/intervention matched to student needs and using learning rate over time and level of performance to make important educational decisions about an individual student.

New York State Regulations define RtI as a school district's process to determine if a student responds to scientific, research-based instruction. RtI represents an important educational strategy to close achievement gaps for all students, including students at-risk, students with disabilities, and English Language Learners, by preventing smaller learning problems from becoming insurmountable gaps.

Reading in the early grades is a primary focus of the RtI process. Reading is the area in which most of the research is available, and also the curriculum area in which most students are identified with learning difficulties. However, the process of data-based decision making and the principles of RtI can apply to reading,

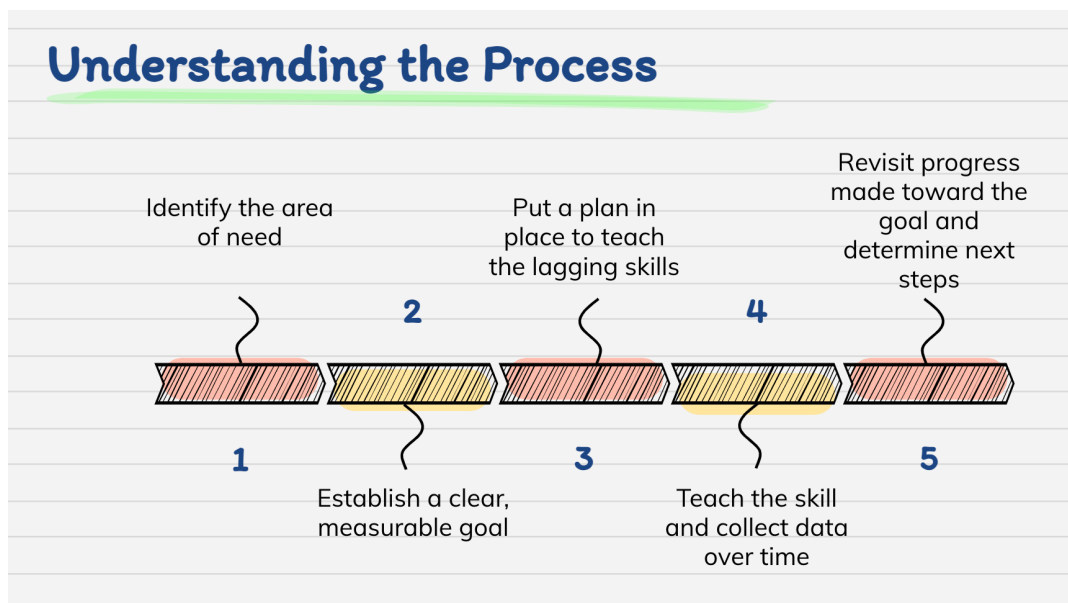

math, and writing as well as content areas at the high school level. RtI can also address behavioral and social-emotional issues that impact learning. The Averill Park Central School District applies RtI in grades K-12.

The RtI process begins with universal screening of all students in grades K-8. The **purpose** is to determine which students need help with instruction. The universal screening provides information about a student's foundational learning. Universal screening is recommended to take place in the beginning of the year, and is repeated again in the winter and the spring.

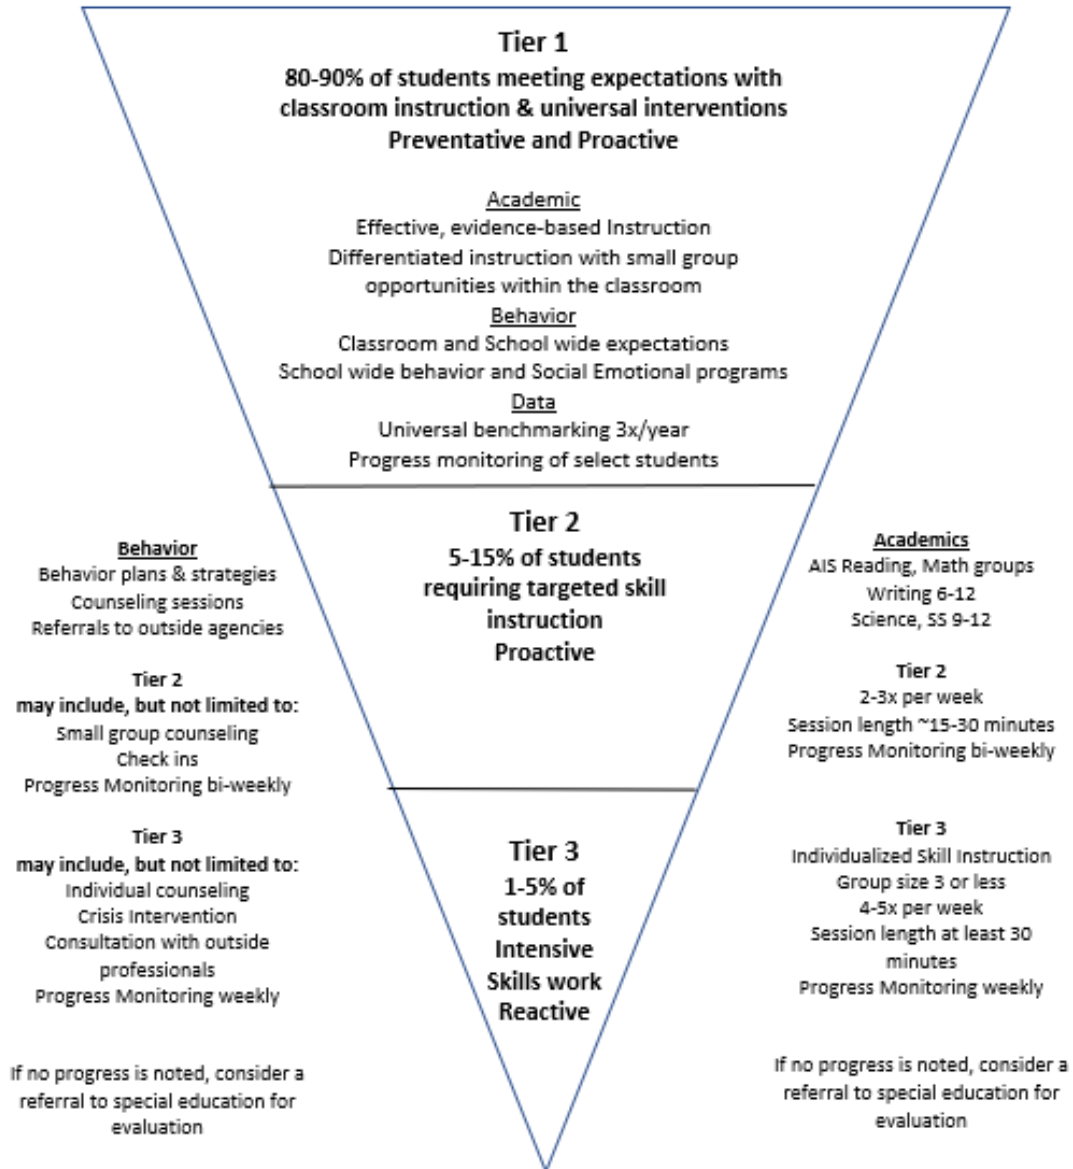

In order to know if an intervention is effective, the progress of students needs to be continuously monitored. Progress monitoring involves using scientifically-based assessments to determine the effectiveness of the interventions. Progress monitoring assesses specific skills that are found in state standards that are therefore part of the academic content. Progress monitoring needs to be applicable to the instructional strategies that are being used to remediate deficits and should be able to be administered repeatedly and efficiently to students over a period of time. If interventions do not correct deficits, a student could be identified as a student with a learning disability, as detailed in the "Learning Disability Criteria," document (Appendix A). RtI has been shown to lead to more appropriate identification and development for students with educational disabilities. Determining whether a student has an educational disability must include data-based information that leads to the determination that a student's educational difficulties are not the result of a lack of an appropriate instructional program or approach.

What are the benefits of RtI?

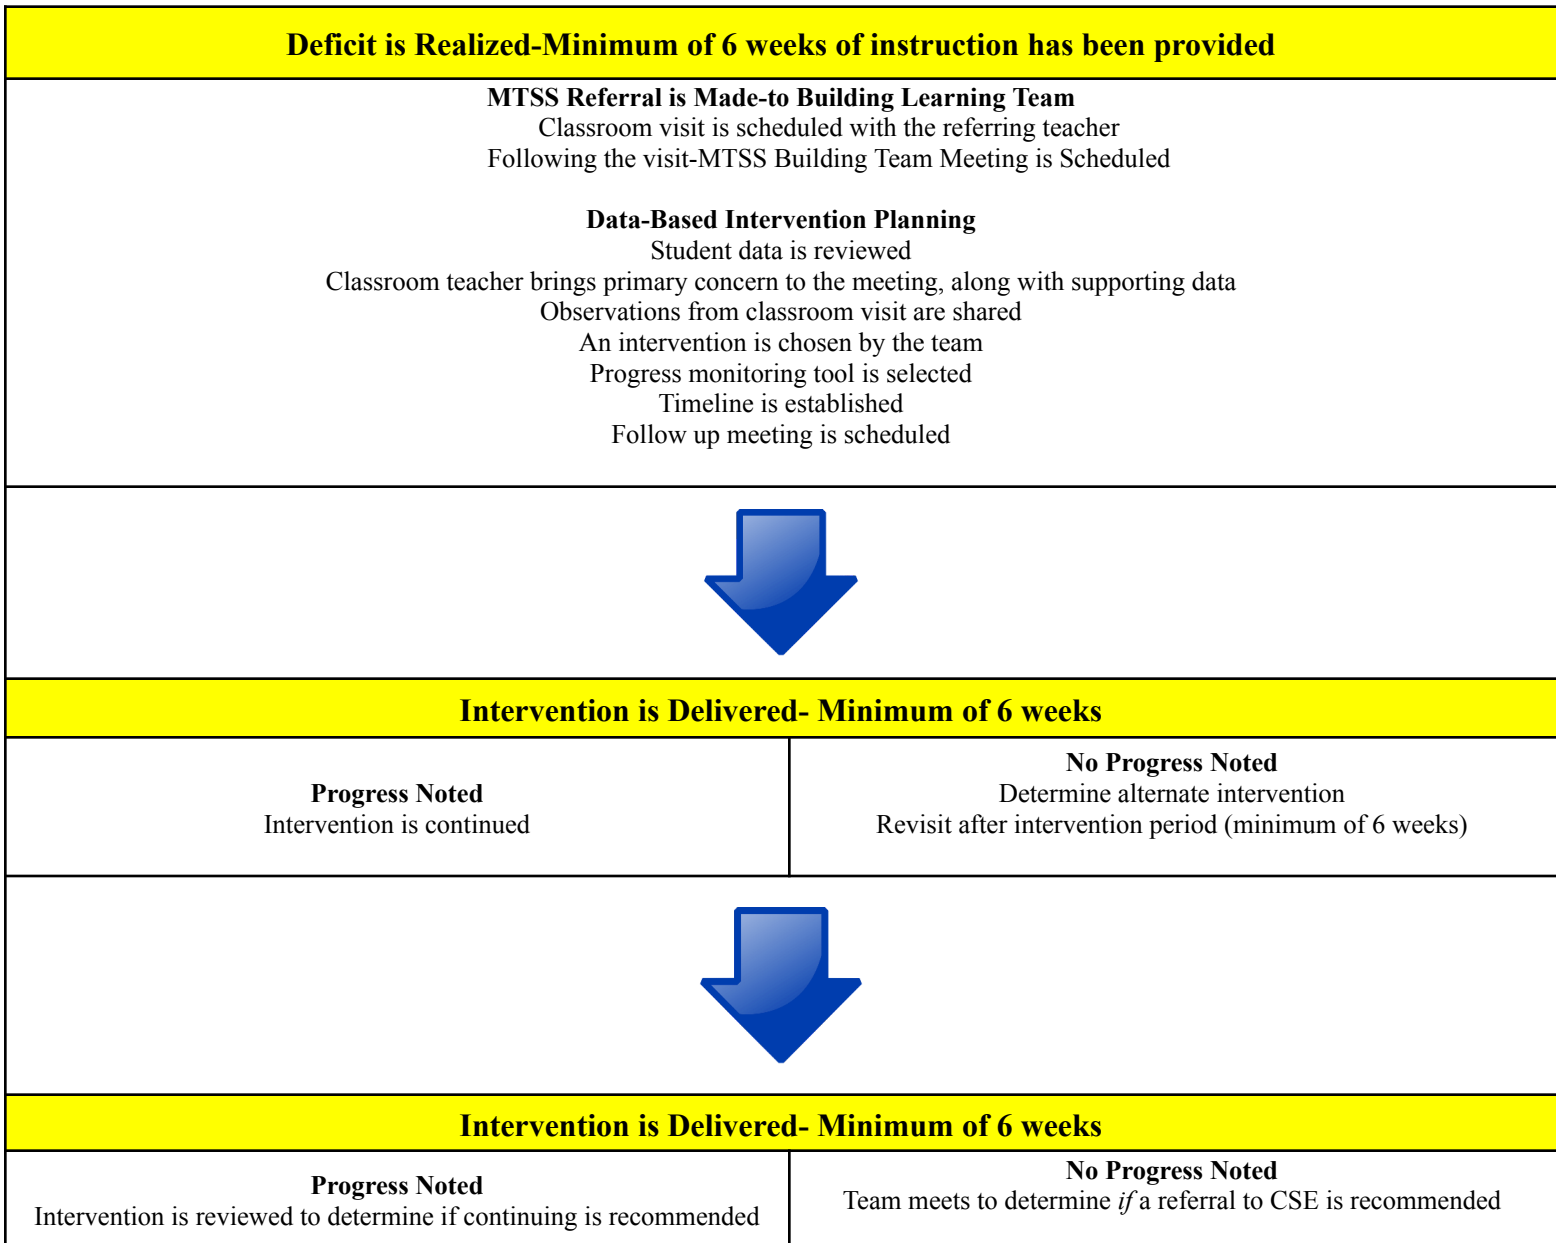

- RtI ensures a shared approach is used in addressing students' diverse needs.
- RtI eliminates the "wait to fail" situation because students get help promptly within the general education setting.
- The RtI approach helps to reduce the number of students referred for special education services while increasing the number of students who are successful within regular education.
- RtI helps to identify the root cause of achievement problems.

RTI PYRAMID

MTSS Process and Protocols

RtI APPROACH

TIER 1: Core Classroom Instruction

- Focus is to provide research based core instruction for all students
- Designed to address the needs of the majority of a school's students (80-90%)
- Uses flexible groupings, ongoing assessment, and targeting of specific skills

Tier 1	
Target Group & Instruction	<p>Instruction is delivered to ALL students in the general education classroom. Instruction will employ scientific, research-based programs delivered with fidelity. For example, reading will include explicit and systematic instruction in phonemic awareness, phonics, vocabulary development, fluency (including oral reading) and comprehension. 80% of students should make adequate progress with Tier 1 instruction.</p> <p>Appropriate instruction in mathematics includes instruction in problem-solving, arithmetic skill and fluency, conceptual knowledge/number sense and reasoning ability.</p> <p>Appropriate behavioral supports and intervention is evidenced by school-wide positive behavioral strategies or approach which reflects a systems approach to discipline that emphasizes prevention and data-based decision-making to both reduce problem behavior and improve academic performance.</p>
Grouping	Multiple and flexible grouping formats to meet student needs
Identify Student Needs/Goal	Students who are not meeting the required benchmarks or grade level standards receive additional support and/or intervention/strategies within the general education classroom.
Duration of Intervention	Approximately 8 weeks (per intervention)
Interventionist	General education classroom teacher
Setting	General education classroom
Frequency of Data Collection	<p><i>Academic Universal Screening: 3x/year as described in the Universal Screening section</i></p> <p><i>Researched based Student Perception Survey: 2x/year</i></p> <p><i>Progress Monitoring: Collected at least every other week; a minimum of 3 progress monitoring data points (per intervention) with student/s in need of instructional support</i></p>

Review	Approximately every 8 weeks; the review will take place with each building's grade level data team.
Duration of Continued Intervention	Dependent upon student response to the intervention/s and progress.
Prior to movement up Tiers	2- 3 interventions/strategies (one at a time, per skill) will be implemented over the course of approximately 8 weeks for each intervention.

Interventions/Best Practices

Academic Interventions	Behavioral Interventions
<p>Planning for Instruction</p> <ul style="list-style-type: none"> • Purpose and goals for learning are clearly stated • Visual supports are provided for students to reference • Formative assessments are used to tailor instruction • Lessons include plans for differentiation of content and instructional method, and student engagement <p>Instruction</p> <ul style="list-style-type: none"> • Explicit instruction of new content including: modeling, demonstration, active engagement, and supervised student practice • Students are taught in both whole group and small groups, tailored to similar instructional needs • Reteaching and review is provided in response to student needs • Curriculum is aligned with NYS Standards <p>Engagement</p> <ul style="list-style-type: none"> • Activities are student-centered • Opportunities for students to respond and participate throughout the lesson are provided <p>Assessment</p> <ul style="list-style-type: none"> • Timely feedback about student performance is provided, both individually and as a whole group • Opportunities are provided for students to demonstrate their learning in different ways • Includes universal, diagnostic, formative, and summative forms, including both formal and informal opportunities for students to demonstrate understanding • Consistent assessment data is collected and recorded 	<p>Classroom Structure</p> <ul style="list-style-type: none"> • Develop predictable systems and routines • Post daily schedule • Develop, post, and implement classroom management plan • "Script" and post steps for most critical routines to maximize time with students • Clearly state expectations • Post written reminders of expectations • Give time for student to take a "break" and get back on track <p>Minimize Distraction:</p> <ul style="list-style-type: none"> • Alternative seating • Use of "private" office with dividers on desk • Establish classroom expectations with regard to noise level/classroom movement (as adopted by each building) <p>Post/Teach/Review/Monitor:</p> <ul style="list-style-type: none"> • Establish behavioral expectations and post them • Teach rules in the context of routines • Prompt or remind students of the rules/provide feedback • Monitor student behavior/collect data • Evaluate the effect/look for trends • Provide remediation to review classroom expectations <p>Actively Engage Students/Observe:</p> <ul style="list-style-type: none"> • Provide time and opportunities for students to respond • Keep records • Focus on the positive • Name desired behaviors/post excellent examples • Review expectations prior to activities <p>Evidence Based Practices to Promote Active Engagement:</p> <ul style="list-style-type: none"> • Nonverbal "check ins" • Mindfulness breaks • Remind students of classroom expectations • Character Education

District Tier 1 Instruction and Programs

	Elementary	Middle School	High School
ELA: Reading & Writing	90 minute/daily K-2 Super Kids 3-5 Reading Side by Side Explicit Phonemic & Phonics instruction	gr 6: 84 minutes/daily gr 7 & 8: 42 minutes/daily Common Lit Expeditionary Learning	80 minutes/alternating days NYS Common Core Standards
Math	60 minutes/daily Eureka Math (NYS Modules)	42 minutes/daily Teacher developed materials based (NYS Modules)	80 minutes/alternating days NYS Common Core Standards

TIER 2: Strategic Interventions (Supplemental Instruction)

- Supplemental, small-group instruction, is provided in addition to and not in place of, the core instruction provided in Tier 1. For example, a student who is receiving Tier 2 intervention would be provided core instruction plus supplemental interventions.
- Interventions focus on the areas of student need or weakness that are identified in the screening, assessment or progress monitoring reports from Tier 1, and other sources of data.
- Students are grouped according to instructional needs.

Tier 2 Intervention	
Target Group	5-15% of the students. For students who have not responded adequately to Tier 1 efforts.
Grouping	Homogeneous small group instruction of approximately 5 students (grades K-5) and up to approximately 8 students (grades 6-12), depending upon the intervention. It is important that the groups be at the same ability/instructional level with the focus on similar skills or content.
Identify Students Needs/Goal	Identify student's goal(s) generated by data demonstrating student need (given response to Tier 1 interventions).
Frequency & Duration of Intervention	Two to three times per week (for approximately 8 weeks) for a minimum of 15-minute interventions, in addition to the core instructional block.
Interventionist	Content Area Teacher or School Counselor
Setting	Setting designated by the team; may be within or outside of the classroom
Frequency of Data Collection	Ideally, every other week progress monitoring on the targeted skill to ensure adequate progress and learning with a minimum of 4 data points (per intervention). Data is recorded and analyzed.
Review	Approximately every 8 weeks; the review will take place with each building's grade level data team. Every 5 weeks at high school via progress reports and monthly RTI Problem Solving Team meetings.
Duration of Continued Intervention	Dependent upon student response to the intervention/s and progress.

Prior to movement up or down Tiers	2-3 interventions (at Tier 2) per skill prior to review by the building's grade level data team, which will determine if a student moves up/down a tier.

TIER 3- Intensive Intervention (Supplemental Instruction)

- Instruction that is explicit, more intensive, and specifically designed to meet student's individual needs
- Designed for students with low skills and/or a sustained lack of adequate progress in Tiers 1 and 2

Tier 3 Intensive Intervention	
Target Group	For 5% of the student population who have not responded adequately to Tier 1 and 2 efforts, or who demonstrate significant needs.
Grouping	Homogeneous small-group instruction of approximately 1-3 students, depending on the intervention. It is important that the groups be at the same ability/instructional level, focusing on similar skills.
Identify Student Needs/Goal	Identify student goal(s) generated by data demonstrating student need given response to Tier 1 and 2 interventions.
Duration of Intervention	Daily intervention/strategy for a minimum of 30 minutes in addition to the core instructional block.
Interventionist	AIS/Intervention Provider and/or Content Area Teacher
Setting	Appropriate setting designated by the team outside of the classroom.
Frequency of Data Collection	Ideally, weekly progress monitoring on targeted skill(s) with data recorded and analyzed.
Review	Approximately every 8 weeks; the review will take place with each building's grade level data team. Every 5 weeks at high school via progress reports and monthly RTI Problem Solving Team meetings.
Duration of Continued Intervention	Dependent upon student response to the intervention/s and progress.
Prior to movement up or down Tiers	2-3 interventions (at Tier 3) per skill prior to movement up or down tiers. The building's grade level data team should meet and review data. The building Psychologist must be present prior to referral to special education.

MTSS Learning Teams

Members of District Level MTSS Team

Assistant Superintendent
 Building Principals
 Directors of Student Supports
 Teacher representatives
 Counseling/Psychologist representatives
 Community Member

Members of Building Level Data Support Team (Elementary & Middle School) and RtI Problem Solving Team (High School)

Schools shall develop data support teams to assist teachers in providing differentiation and accommodations for students who are having difficulties in the core curriculum. These teams provide suggestions to the teacher for possible interventions for struggling students. Members may include:

- Building Principal/Assistant Principal/s
- Classroom Teacher(s)
- Special Education Teacher(s)
- AIS Provider/s
- Psychologist
- School Counselor, Social Worker
- ELL Teacher

Student data is crucial in order to:

- Make accurate decisions about the effectiveness of general education instruction and interventions
- Undertake early identification/intervention with academic and behavioral problems
- Prevent unnecessary and excessive identification of students with disabilities
- Determine individual educational programs needed; deliver and evaluate services

Problem Solving Model:

The problem-solving model involves an in-depth analysis of skill deficits and instructional and environmental variables that comprise a student's academic performance (Shapiro, 2009). Information obtained from the examination of instructional variables is used to identify sub-skill deficits and inform targeted interventions. The problem-solving model to be used by the building's grade level data team is a four-step process that involves the following steps:

1. Conceptualize the problem (Is there a problem? What is it?)
2. Examine variables that may be influencing the problem (Why is it happening?)
3. Deliver targeted or individualized interventions (What shall we do about it?)
4. Evaluate the effectiveness of the intervention (Did the intervention work?)

ASSESSMENTS & EVIDENCE USED TO DETERMINE STUDENT NEED FOR RtI/AIS SERVICES

Evidence may include:

Report Cards, Classwork, Class Participation, Discipline Records, Attendance, Medical Diagnoses, Mental Health Diagnoses, Educationally related disabilities, ELL Performance, Prior evaluations, Behavioral data, Previous/Current RtI/AIS and/or special education services, formative & summative assessments.

UNIVERSAL SCREENING

An assessment process used with all children within a given grade, school building, or district for the purposes of identifying or predicting students who may be at-risk academically. The universal screening will be given to all students in Grades K-8 in the fall, winter and spring.

ELA and Math Universal Screening by Grade Level

Nonsense Words		Fall & Winter only			
Letter & Sound ID	winter & spring only				

PROGRESS MONITORING

Progress monitoring is a scientifically based practice that is used to assess student's academic and/or behavior performance and evaluate the effectiveness of instruction. Progress monitoring provides more instructionally relevant information than traditional assessments.

To implement progress monitoring:

- The student's current levels of performance are determined in specific academic skill areas (i.e. reading, writing, and/or math)
- Goals for learning in each identified area of deficit are created with anticipated dates for achievement.
 - Students may be progress monitored in more than one academic area, if needed.
- The student's academic performance is measured on a regular basis (depending on the intervention).
 - Tier 1 & 2- Typically every other week
 - Tier 3- Typically weekly
 - Progress monitoring data will be reviewed approximately every 8 weeks by the building's grade level data team and more regularly by the AIS provider and/or teacher. Progress reports will be reviewed approximately every 5 weeks by the high school's RtI Problem Solving Team and more regularly by the AIS provider and/or teacher.
- Teaching is adjusted as needed.
- Student's progression of achievement continues to be monitored once intervention is modified
- Progress toward meeting the student's goals or target is measured by comparing expected and actual rates of learning and documented.

PARENTAL/GUARDIAN INVOLVEMENT

Parent/Guardian involvement in the RtI and AIS tiered service delivery model, or any service delivery system, should be characterized by consistent, organized, and meaningful two-way communication between school personnel and parents/guardians with regard to student progress and related school activities. Through this communication, a parent/guardian is able to play an important role in their child's education by assisting in their learning process and by being involved in decision making as it affects instruction to increase their child's achievement. The APCSD believes that positive family engagement is essential to student achievement and thus encourages such involvement in school educational planning and operations. Parents/Guardians are encouraged to be actively involved in their child's education at school and are included as full partners in the decision-making to assist in the education of their child.

In a school setting that is implementing the RtI model, parents/guardians should expect to receive information about their child's needs, the interventions that are being used, who is delivering the instruction, and the academic progress expected for their child. Frequent communication with the school, receipt of regular progress (or lack of progress) information, and participation in decision making should provide parents/guardians the information needed to determine whether their child should be referred for special education evaluation.

NOTIFICATION & COMMUNICATION

Parents/Guardians are notified when their child requires an intervention (Tier 2 & 3) beyond what is provided to all students in the general education classroom. Notification is provided to parents/guardians via a phone call, e-mail, and/or letter (see Appendix C) that indicates:

The nature of the intervention their child will be receiving:

- o Type of intervention
- o Frequency
- o Duration
- o AIS Provider
- o Location

Progress will be reported to parents/guardians via written reports and/or progress monitoring data on the same schedule as report cards and at the high school, every 5 weeks on the progress reports. Teacher conferences and/or consultations may be provided, and parents/guardians may be given suggestions for working with the student at home. When AIS is discontinued, the parent/guardian will be notified in writing that the services will be ending, and the criteria for ending services. The classroom teacher, AIS provider, and/or school counselor may be responsible for the above-required communications.

PROFESSIONAL DEVELOPMENT

Part 100.2 (ii)(3) requires each school district take "appropriate steps to ensure that staff have the knowledge and skills necessary to implement a RtI program and that such program is implemented consistent with the specific structure and components of the RtI process selected by the school district." The Averill Park Central School District will provide professional development as described in the Professional Learning Plan.

APPENDIX A

Learning Disability Criteria

Individuals with Disabilities Education Act (IDEA):

- In making a determination of eligibility a child shall not be determined to be a child with a disability if the determinant factor for such determination is lack of appropriate instruction in math or reading, including in the essential components of reading instruction.
- If the child has not made adequate progress after an appropriate period of time with appropriate intervention, a referral for an evaluation to determine if the child needs special education and related services must be made.
- For a child suspected of having a specific learning disability, the group must consider, as part of the evaluation:
 - Prior to, or as a part of the referral process, the child was provided appropriate high-quality, research-based instruction in regular education settings, including that the instruction was delivered by qualified personnel.
 - Data-based documentation of repeated assessments of achievement at reasonable intervals, reflecting formal assessment of student progress during instruction, which was provided to the child's parents.

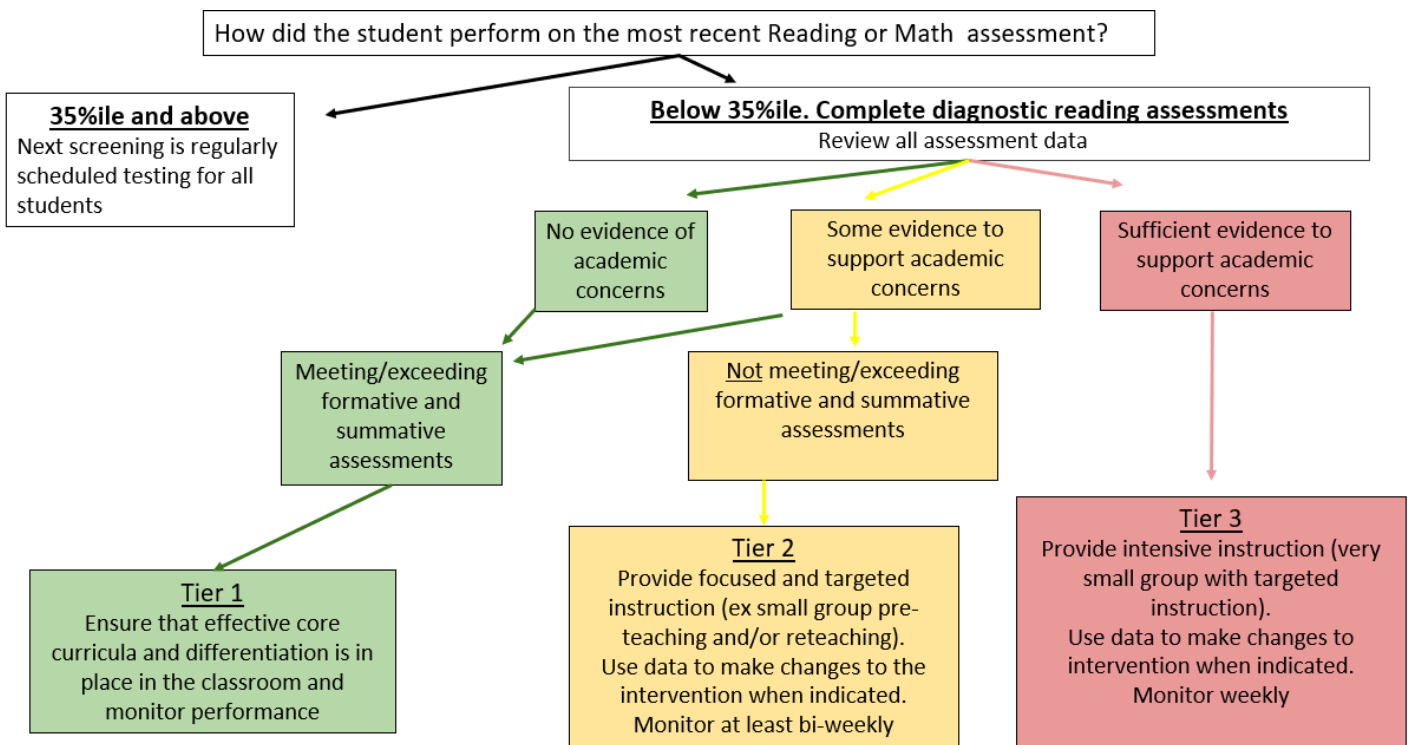

DEFINITION:

Part 200 definition of learning disability: means a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, which manifests itself in an imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations, as determined in accordance with section 200.4(j). The term includes such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The following exclusionary factors are listed:

- Visual, hearing, or motor disabilities
- Intellectual disability
- Emotional disturbance
- Cultural factors
- Environmental factors or economically disadvantaged
- Limited English proficiency
- Lack of adequate instruction (either from attendance or adequate instruction)
